

For greater value in fixed line communications

Through TalkFixed your business can make substantial cost savings on international calls to any destination using your existing telephone lines, without changing your business phone numbers.

- Significant cost savings on international calls
- No capital expenditure required
- No need for physical installation or any additional equipment
- Easy to integrate into your existing telephone system
- Next generation premium VoIP technology

Would you like to
save on international calls
without changing your number

With TalkFixed you can.

The Kalaam Advantage

- Dedicated Corporate Account Manager
- Online Account Management Portal
- 24/7 Dedicated Customer Care
- Strong and Defined Service Level Agreements
- Premium Next Generation Network Technology

TalkFixed has two service options:

1. If you select the direct dialing option, we inform your existing service provider that your international calls will be routed through the Kalaam network. Once the service is activated, you can proceed to dial international numbers as usual.
2. The indirect dialing option requires that you dial an access number to reach the Kalaam network each time you make an international call using this service. This facility can be programmed into your extension or PBX depending on its capabilities.
