

Case Study

Modern Network Solution with Synchronized Security

Overview

More and more sophisticated and targeted attacks made it necessary for a leading 5-star hotel with 200 staff to replace their existing, outdated infrastructure and start looking for a more modern network security solution that would grow with the business and its requirements. The lookout was for easier, more manageable security that also offers protection for non-technical users and their devices on-site and on the go from zero-day attacks, advanced threats, and ransomware.

Solution

Customer was introduced to SOPHOS Synchronized Security consisting of SOPHOS Firewall, Endpoint Protection & Email security all of them being managed from SOPHOS cloud platform.

Results

Customer got a fully integrated solution which provides improved protection against blended security threats. It also removes the cost and complexity of multiple point solutions.
