

Case Study

Private Hospital with stable internet connectivity

Overview

A leading Private hospital was looking to have a Highly Available and Stable Internet connectivity as this kind of internet setup is highly critical to the nature of their service.

Solution

Kalaam Telecom met with hospitals IT director and proposed them a highly available internet solution comprising of primary connectivity on wired and secondary on wireless link thus benefiting not only from wired connectivity but also from Kalaam Telecom's robust wireless POP setup in Bahrain.

Results

Customer got a Highly Available internet connectivity on 2 different media's which is configured as Active/Passive auto configured in a such a way should primary link fail the secondary link will take over automatically.
