

# Communication Solutions For Educational Sector

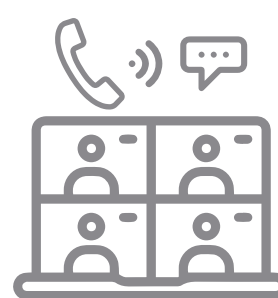

Educational Institutions want to offer the best learning experience for students and the ability to communicate with parents, staff and students at instant notice to ensure everyone is informed wherever they are in real time.

## Kalaam offers tailored Voice & Communication Solutions

### Classroom Digital Solution

One-Screen Solution to enable interactive classroom teaching, online & offline

### Unified Communications Solution

Single Platform to communicate seamlessly using device & soft-phone application

### Student Collaboration Solution

Collaboration Tools to work together on assignments & projects

## Success Story

A tier one school with approx. 9000 students and 1400 employees required replacement of the school's aging phone system. The faculty faced critical need to stay connected when working outside the office. The solution offered was Unified Communications (UCaaS) and IP Phones. This enabled mobility and collaboration tools, giving the faculty an in-office experience. This was backed by high reliability, uptime and seamless integration with existing infrastructure.

### Improve Student Experience

Advanced communications solution leads to a better experience in the classroom.

### Leverage Your Investments

Integrate new systems or upgrade using existing ones to save more.

### Improve Crisis Communication

Enable real time communication with students & staff during important events.
