

# An Asset Management Company Upgrades to Kalaam's Ultra-Fast Managed Dedicated Internet Access

Location: Bahrain | Industry: Real-Estate | Cluster: Connectivity

**Having reliable and stable internet connectivity with high bandwidth requirements for their primary and backup links.**

The company needed managed internet connectivity that offers redundancy and better capacity to serve their increasing business demands.

**Kalaam provided a high bandwidth Dedicated Internet Access (DIA) for the backup link as a proof of concept (POC).**

We adopted the Try & Buy model, demonstrating our competence by offering the company a link to assess the stability, speed, and latency of our managed DIA service over fiber.

Following the successful proof of concept, the company chose to proceed with Kalaam's managed DIA solution and moved their network traffic from the existing provider's link to Kalaam's upgraded managed DIA through successful migration.

**"We needed a stable network on which we could rely, and Kalaam's robust network capabilities exceeded our expectations by upgrading our link to higher bandwidth and faster throughput."**

Customer Testimonial

## Overview

*For 25 years, a Bahraini asset management company created in 1997 with its headquarters in Manama maintained a global presence, controlling roughly \$30 billion in investments across five strategic locations: Bahrain, the United Kingdom, the United States, Saudi Arabia, and Singapore. The company is dedicated to delivering innovative products for its customers and staying up to date with market trends, which requires a continuous connection to the world through a stable network.*

### Benefits

**Faster Throughput**

**Best in Class SLA**

**24/7 Managed DIA**
