

Kalaam's CCTV Solution has been Adopted by a Governmental Entity for the Surveillance of the Saudi National Day event

Location: KSA | Industry: Government | Cluster: ICT & Digital Solutions

Deliver and install a robust CCTV system consisting of 100 outdoor cameras, particularly for the event area, five days before National Saudi Day.

As the event date approached, the governmental entity searched for a capable partner to supply a CCTV system for the event's outside area within a tight timeframe of 5 days. Within this short period, all associated activities should be executed, such as conducting a site survey and delivering and installing the camera system on an 100,000-square-foot area, in addition to providing the monitoring capabilities.

Kalaam provided a comprehensive solution for the CCTV system, covering connectivity, hardware components, and security measures within a 5-day timeframe.

Within the requested timeframe, the Kalaam team successfully completed the mission by undertaking the following activities:

- Conducting site surveys.
- Delivering and installing 100 cameras.
- Installing over 10 cabinets.
- Setting up poles, cabinets, and power cables.
- Providing and installing fiber connectivity, along with configuring industrial switches.
- Establishing a fully-equipped server room with all necessary equipment.
- Equipping a control room with three 65" screens and three CCTV monitor PCs.
- Programming and configuring cameras and NVRs.

Benefits

All round CCTV Surveillance

Low TCO

Single Point of Monitoring

"We aimed to have the National Day event area under CCTV surveillance, and we were truly impressed by Kalaam's team for their remarkable effort in swiftly delivering the solution to the event site on short notice."

Customer Testimonial

Overview

A government department in Saudi Arabia responsible for overseeing national security and managing matters related to naturalization, immigration, and customs. It employs a workforce of around 5,000 individuals. Annually, on September 23rd, Saudi Arabia celebrates National Saudi Day, and this department plays a central role in managing the security surveillance activities and festivals, and ensuring safety of citizens. Hence, they needed a CCTV solution to monitor the celebration.
