Case Study

Robust Networking Solution for every Classroom

Overview

A leading Private school in Bahrain accredited by Cambridge International School wanted to provide paperless learning experience for their students. For this they needed a robust Wifi infrastructure & Internet connectivity for every classroom. The objective of the school was to achieve this at a cost-effective price point as this requirement was not budget by the school for that fiscal year.

Solution

Kalaam Telecom met up with school's senior management and presented their Wifi infrastructure & Internet connectivity solution which not only was robust but cost effective plus they gave the school a monthly billing model i.e. lease to own for one year for the Wifi infrastructure which helped them counter their budget issue.

Results

Customer got a robust, cost effective, lease to own Wifi infrastructure which helped them fulfill their paperless learning experience vision.
